

COMPANY PROFILE

Bridging Investors and Resources in Zambia's Mining Sector

Driving growth in the Zambian mining sector by facilitating mining investments and mineral brokerage for sustainable development.

We build capability in the Mining Industry

Fusion Mining Co. Ltd recognizes the emerging supercycle in Zambia's mining industry, driven by the global demand for critical minerals and the transition to alternative energy solutions. As the world shifts towards sustainable energy, we believe Zambia's vast mineral wealth holds the key to powering this future. By bridging local mining license holders with global investors and promoting responsible Mining, we are building the foundation for a resilient, inclusive, and future-ready mining sector.

To this end, Fusion Mining Co. Ltd has built tailored capabilities to meet Africa's emerging mining realities — fostering investment, partnerships, and sustainable development in Zambia's resource sector.

How do we assist the mining sector in Zambia?

Mining Ops.

Investment

Brokerage

We aim to provide Significant Value Creation, Workforce Business Literacy, and software solutions to assist executives and managers in making well informed decisions that promote operational efficiency, profitability, and long-term sustainability.

Traditionally, optimization in the mining industry has been siloed — with each function focused on achieving excellence within its own specialized area. At Fusion Mining Co. Ltd, we take a different approach. We apply an integrated model that combines Processes, Systems, and Technology to view the entire mining operation as a unified system. This holistic perspective allows us to uncover hidden value across the core process, drive operational synergy, and unlock efficiencies that would otherwise go unnoticed.

Purpose Statement

To serve as a reliable bridge between local mineral rights owners and international investors by offering transparent, value-driven mining exploration, transaction advisory, and community-inclusive mining models.

Values

Win-win relationships, excellence, and transparency.

Adding value to operations in Zambia's mining

At Fusion Mining Co. Ltd, our operational philosophy is centered on unlocking the full value of Zambia's mineral resources through efficient, responsible, and community-inclusive mining. We assist investors and license holders in establishing scalable mining operations, especially in areas with high-potential but underutilized ore bodies.

Our approach emphasizes practical, flexible, and cost-effective mining models, suitable for smaller deposits or sites with shorter mine life spans. These operations are designed to be quickly deployable, utilizing modular infrastructure that can be established and decommissioned with minimal environmental impact.

Community engagement and benefit-sharing are integral to our business. We work closely with traditional leadership and local stakeholders to ensure mining operations contribute positively to surrounding communities—through employment, infrastructure development, and environmental stewardship.

Fusion Mining is committed to a model of mining that is not only economically viable but socially and environmentally responsible, ensuring that the benefits of mineral development are shared broadly and sustainably.

Services Offered By Fusion Mining Co.Ltd

If you want to unlock greater value across your mining operations, you need partners who offer strategic insight, market access, and practical tools for success. Fusion Mining Co. Ltd provides the expertise, networks, and support that help you navigate complexities, seize opportunities, and move confidently toward your goals.

Mining Investment Facilitation

We help both local license owners and foreign investors build mutually beneficial partnerships through tailored joint venture arrangements. From negotiation support to legal coordination, Fusion Mining ensures the JV is fair, sustainable, and strategically aligned for long-term success.

We understand the unique expectations of foreign investors, especially from China, and help local partners present opportunities in a structured, investment-ready format. Whether it's capital investment, technical support, or production partnerships, we handle the groundwork that makes collaboration seamless.

“Our goal is to create JVs that empower local stakeholders while delivering predictable returns to global investors — balancing profit with shared responsibility.”

Mineral Brokerage

Fusion Mining Co. Ltd acts as a trusted intermediary in the mineral trade, facilitating secure and transparent transactions between sellers and buyers — both local and international. Our brokerage services are grounded in regulatory compliance, risk management, and market intelligence.

We specialize in key Zambian commodities such as copper, gold, manganese, and gemstones, ensuring both parties get fair value through proper documentation, transactions, and logistics coordination. Our strong networks and local presence help mitigate common challenges in mineral trading, while promoting trust, speed, and accountability in every deal.

“In a market where trust and transparency are often barriers to trade, Fusion Mining ensures minerals move from ground to market — ethically, and profitably.”

Regulatory & Licensing Support

Navigating the mining regulatory framework in Zambia can be complex. We assist clients in acquiring exploration or mining licenses, renewing them, and ensuring compliance with all legal and environmental obligations. We also help prepare Memorandums of Understanding (MOUs) with traditional authorities and obtain consent letters for customary land.

Mining Operations & Development Supports

Beyond exploration, Fusion Mining is actively positioning itself as a mining operator. We plan and support the development of mines through site preparation, small-scale production startup, infrastructure setup, and coordination with local and foreign technical teams. Our goal is to transition from exploration to responsible extraction in areas where feasibility is established, leveraging partnerships to build sustainable mining projects that contribute to national development.

Chinese Investor Consulting & Translation Services

With an experienced Chinese liaison team, Fusion Mining Co. Ltd facilitates seamless communication and collaboration between local stakeholders and Chinese investors. We provide professional interpretation services during meetings and negotiations to prevent misunderstandings and ensure clarity. Additionally, we translate contracts, business proposals, technical reports, and other official documents between English and Chinese. Beyond language, we offer cultural advisory services to bridge the gap in business etiquette, expectations, and decision-making styles—ensuring that partnerships are built on mutual understanding, respect, and trust from the outset.

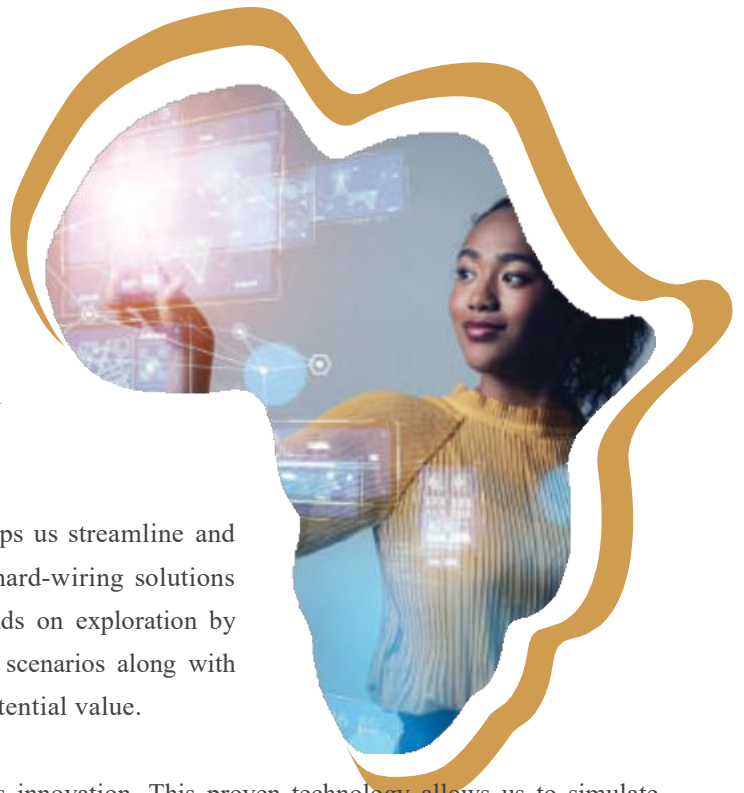

Insightize™

We provide step change value discovery and sustainable growth to mining, supported by software solutions to support executive decision making

This first-to-market Executive Decision Support Software helps us streamline and refine our services to strengthen operational disciplines by hard-wiring solutions tailored to unique scenarios. Essentially, the software expands on exploration by simulating outcomes to provide valuable insight into potential scenarios along with countermeasures to avoid operational challenges and improve potential value.

Insightize™ is a solution that maximizes value through process innovation. This proven technology allows us to simulate scenarios to analyse and report on the impact of potential management and engineering decisions throughout the entire mining , energy and logistic systems, including financials and employee KPIs. The software solution analyses the impact within a few hours instead of weeks or months, allowing companies to improve value sooner rather than later.

Key Projects & Licenses

Kasempa Project (North-Western Province): Large-scale exploration license in process; initial geochemical surveys and sampling completed. Strong collaboration with the Chief established.

Serenje Project (Central Province) : Exploration license pending validation. Environmental and Social Impact documentation submitted to ZEMA.

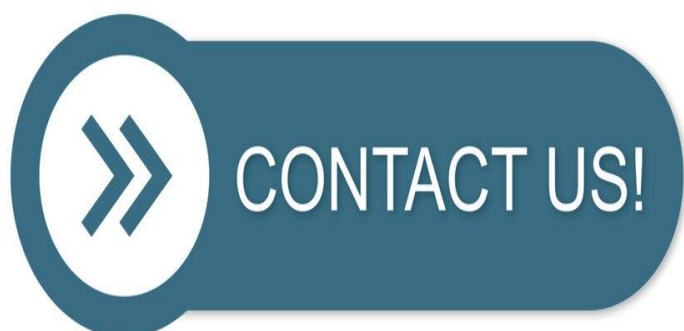

Kawambwa Project (Luapula Province): Fully approved large-scale mining license. Planning stage underway for copper development.

Chembe project (Luapula Province) : Fully approved large-scale exploration mining license. Planning stage underway for copper development. **Joint Venture.**

Mansa project (Luapula Province) : Fully approved small-scale exploration mining license. Planning stage underway for copper development. **Joint Venture.**
